INTUITIVE SOLUTION FOR ALL-DAY CHANNEL RECORDING

Created with the help of our users,
for the mutual satisfaction.

24/7 RECORDING OF 2 SDI INPUTS

- If you need 24/7/365 recording of your channel, you are in the right place - our D.Logger is an affordable solution, yet very stable and reliable. You can be sure that everything will be captured and ready for further manipulation, and a built-in time code bears witness to the content's broadcast time.
- Recording is segmented and user itself determines the length of the segment, according to their needs. This is recommended for safety reasons (power failure, sudden computer shutdown, etc.), but also be able to easily find specific recorded material when you have a lot of recordings.
- In addition to fulfilling legal obligations, recording your channel can also be useful for marketing purposes. You can deliver an accurate report and proof to your customers that their commercial spots were aired and when exactly.

COMPLIANCE

- If authorized institutions require from you to provide them with a recording of broadcasted content - you have nothing to worry about! With our D.Logger you will quickly and easily be able to submit a recording for a specific period, because this software has predefined recording profiles which are compliant formats for regulatory agencies.

MONITORING

- Smart notifications help you to always have control over your software's work - you will be notified via e-mail in case that recording has stopped, in the case of a black screen, freeze, lack of sound and similar potential problems.

CUSTOMIZATION

- You can customize the work of the software by your own needs – many settings of the recording quality are available, from the selection of bit rate (between 128 Kbps and 1.5 Mbps) to the format selection (the default format is WMV 9 format, but MPEG1, MPEG2, MPEG4 and H-264 / AVC are also supported).

ABOUT US

We provide our clients with 24/7/365 direct support through all communication channels.

Our clients and we think alike. We use our solutions on a daily basis and we find ways to simplify the job and to make sure that, at the end of a day, the outcome of the work of all employees in television is better.

We are in constant contact with customers and based on their demands, we constantly innovate. Having a year to year growth and learning together with our customers from all around the world is a personal pleasure. We accept their proposals, adapt to their concept and we love the challenges. We are ready to customize our solutions to the specific needs of each of our customers.

Teamwork is one of the main forces of our organization and that is why our solutions tend to be a result of collaboration and synergy.

Today, Dovecher.tv is recognized as the only domestic, 100% Serbian brand and company that produces complete software solutions for the automation of large, but also medium-sized television stations.

Our solutions increase efficiency in work, reduce the cost of program production, increase earnings and minimize the risk of broadcasting errors. All our individual solutions can work completely independently, but also as a single entity, which in this case results in a drastic increase in efficiency.
